HHRD in Cambodia

HHRD works globally with a particular focus in countries where most of the population lives below the poverty line. HHRD has successful relief and development programs in Cambodia, including seasonal Ramadan activities, poverty alleviation, orphan support, and medical care. In addition, HHRD continues to provide educational support for orphaned children through our Orphan Sponsorship Program.

HHRD Status

HHRD is in Cambodia, assisting residents with fresh water needs through our Water and Sanitation Hygiene (WASH) program.

Water-borne diseases are rampant in areas where there are limited hygiene options. HHRD installs functioning washrooms, provides primary hygiene education, and distributes hygiene kits in communities affected by water emergencies.

Country Context

Millions of landmines remain in Cambodian fields from years of warfare, severely restricting the land available for cultivation. In addition, illegal logging has contributed to the deforestation of nearly a quarter of Cambodia's land. In September 2020, hundreds of families were forced to evacuate as extreme climate activity caused flooding across the Mekong region.
