  - 350 beneficiaries

Seasonal Food:

- **Ramadan Food**
  - 9,000 beneficiaries / iftar meals

- **Udhiya/Qurbani**
  - 73,059 beneficiaries

HHRD in Kenya

HHRD works globally with a particular focus in countries where most of the population lives below the poverty line. HHRD established a permanent field office in Kenya's capital city, Nairobi, in 2011. Since then, it has provided emergency relief along with in-kind gifts and initiated critical developmental programs, including Skills Development and Livelihood, Education Support, Health Care and Nutrition, Orphan Support, and Water Sanitation, to bring real change to the country's residents. Emergency relief includes food, clothing, and medical supplies. The Orphan Support program allows donors to support individual orphans with everything, including their education, food, clothing, and medical needs. In addition, HHRD set out to train artisans in developing and marketing products to bring economic stability to the region. Free cataract eye surgeries were conducted in Kenya, Somalia, Uganda, and Tanzania. In rural areas, shallow-well pumps were dug, which draw water to the surface, allowing community members quick access to clean drinking water from closer sources.

**HHRD Status**

HHRD is registered as an International NGO (INGO) with offices and team members in Kenya, Somalia, Uganda, and Tanzania. We are conducting several developmental programs and projects, including Water and Sanitation Hygiene (WASH), Healthcare and Nutrition, Orphan Support, Skills Development and Livelihood, and Seasonal programs.

- **200 Million** lives changed

Country Context

In Kenya, drought conditions have exacerbated chronic stressors, including food insecurity and malnutrition. In addition, vulnerable populations across Kenya continue to confront several other challenges—including seasonal flooding, localized intercommunal conflict, disease outbreaks, and limited access to health and water, sanitation, and hygiene services. The humanitarian situation in Kenya has deteriorated further due to the COVID-19 pandemic, slow recovery from the 2019 drought, a desert locust invasion, massive floods, and disease outbreaks such as cholera, malaria, and respiratory illness. Outbreaks of COVID-19 in densely populated refugee camps are difficult to contain with limited quarantine facilities. In addition, the wildlife tourism industry has been devastated by the virus, robbing the country of one of its chief revenue producers.

Key Figures

- 1 billion lack access to safe water
- 16.1 million children lack access to education
- Over 500,000 refugees
- Over 531,000 children acutely malnourished
- 256,000 COVID-19 cases to date

Our Impact

Orphan Support Program

Zaitun Mohamed, a sister of HHRD sponsored orphans, lives in the Mukuru slums of Nairobi. After their father’s passing, their life changed drastically leaving them with challenges they never imaged. Their mother could not work due to an injury sustained from an accident, and the children dropped out of school.

In 2019, the family approached HHRD and the two siblings were enrolled in the Orphan Support program. As a result, they were admitted at Bridge Academy, where their school tuition was fully paid and meals were served on premise. In addition, they received food packages, educational materials, health screenings, and treatment services. Zaitun testifies that they were relieved when HHRD began to support them. The food they get helps them, and her siblings’ education also gives them hope for a better tomorrow.
