399,591 beneficiaries

HHRD in Pakistan

HHRD works globally with a particular focus in countries where most of the population lives below the poverty line. Since 2005, HHRD has provided relief initiatives in Pakistan through a series of long-term developmental programs to make a sustainable impact. These programs align with the government of Pakistan's "Goals of Vision 2025" while adhering to the United Nations' Sustainable Development Goals that several other international entities such as USAID, WFP, WHO, UNICEF are adopting. HHRD is working in around 90 out of 154 districts through 13 relief & developmental programs, including Emergency Relief & Disaster Management, Orphan Support, Education Support, Skills Development Livelihood, Children with Disabilities, Comprehensive Physical Rehabilitation, Health Care and Nutrition, Water for Life, Water and Sanitation Hygiene, In-Kind Gifts, and Seasonal Programs.

HHRD Status

Since 2005, HHRD has successfully continued long-term programs in Pakistan and received the status of an international NGO. HHRD, in coordination with PDMA, has received a No Objection Certificate (NOC) to provide humanitarian aid. HHRD conducts needs assessments and provides food, shelter, non-food items, and healthcare assistance.

Country Context

In Pakistan, humanitarian needs are driven by armed conflict, natural disasters, droughts and floods, and malnutrition crises. Volatility from neighboring countries, threats from the monsoon season, and earthquakes are factors that are troubling this thriving nation. Pakistan has also hosted the second-largest number of refugees globally. Millions have come from Afghanistan seeking refuge for the past 40 years. Risks are exacerbated for many affected communities by pervasive poverty and poor access to essential services, including safe water, sanitation, and healthcare. Lack of access to proper sanitation facilities negatively impacts the health and well-being of children. In 2020, monsoon rains caused massive flooding. More than 400 people have died, and more than 200,000 homes have been destroyed. Entire harvests have been lost, and more than 68,000 people have been displaced to relief camps. Sewage swamps the streets; widespread power outages and limited mobility frustrate recovery efforts.

Key Figures

11 million

people in need of humanitarian assistance

70%

of households drink contaminated water

43%

of the population suffers from food insecurity

Our Impact

Water for Life

In Azad Jammu & Kashmir (AJK), 69 Gravity Flow schemes were completed in Poonch, Bagh, and Jehlum Valley. Through these schemes, about 40,000 people received access to safe drinking water at their doorsteps. These schemes reshaped the lives of communities. People of AJK stated that they had to travel long distances for drinking water before these projects. The government of AJK highly praised and acknowledged the efforts of HHRD for the provision of drinking water to vulnerable communities of Azad Jammu & Kashmir.
